THERE'S NO BETTER WAY

Aircode™ emulates nature's own way of purifying air by providing balanced quantities of positive and negative ions. Air is purified in the space itself.

Paper handling	up to 99%	airborne particles
Metal machining	up to 90%	smoke, oil mist
Plastics machining	up to 99%	solvents
Print shops	up to 99%	benzene, toluene
Foodstuffs industry	up to 99%	mould spores, odours and bacteria
Static electricity	100%	eliminated immediately

CUSTOMER REFERENCES

Mats Ovegård, Quality manager for ICA stores, says:

"Aircode will improve the environment for employees and customers alike with fresher air in the store and a cleaner, odourless, bacteria-free working environment in waste handling and return bottle storage areas."

Magnus Nystrand, one of many Harry's innkeepers says:

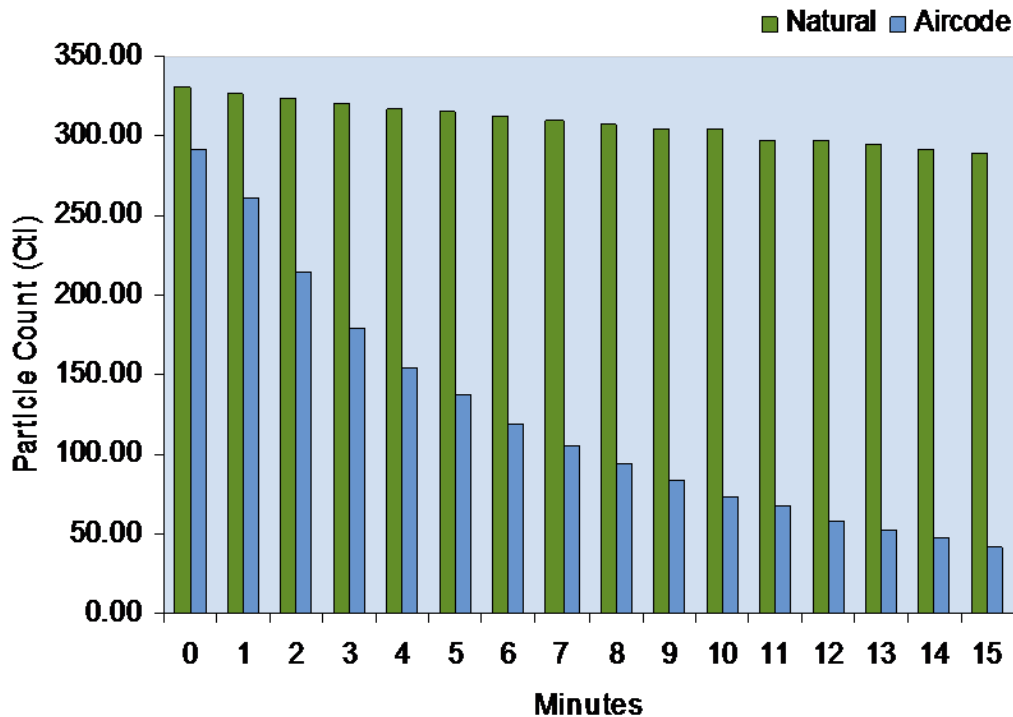

"Since we installed Aircode™ we've had really great feedback from people, especially those with asthmatic issues. They tell us that the indoor air at Harry's is unique in the industry."

FABULOUS FIGURES

Particle Reduction

Aircode is a documented technology that simply and efficiently helps to eliminate particles, spores, gases and static electricity to create a healthier indoor atmosphere for people, fresh produce and equipment.

TESTS

WEST PENNANT HILLS SPORTS CLUB AND STAR CITY CASINO

Reductions of up to:

- ✓ Microorganisms – 95%
- ✓ Odours – 59%
 - ✓ Up to 20 times faster reduction of cigarette smoke
- ✓ Airborne particles – 69%
- ✓ Ethylene – From 3 ppm to almost zero (0.1 ppm)

Tests carried out by
Sydney Postharvest Laboratory

ID AC-500 / CX-100

Aircode has 8 different units in order to meet customer requirements. They can be wall or ceiling mounted, portable or installed in ventilation systems.

Aircode ID AC-500
For installation in ventilation systems

Aircode CX-100
Installed with 4 screws and one plug

IN-DUCT INSTALLATIONS

Various types of installation where Aircode is easily installed in existing ventilation for maximum effect and the lowest possible cost for the customer.

Since the installation, the doctors' lounge at Bumrungrad Hospital in Bangkok feels like a completely new room. In total there is over 60 Aircode units installed in the hospital.

IN-DUCT INSTALLATIONS

Harry's in Linköping treats the air in the dance floor area, main bar entrance and toilets with two IDAC550 units.

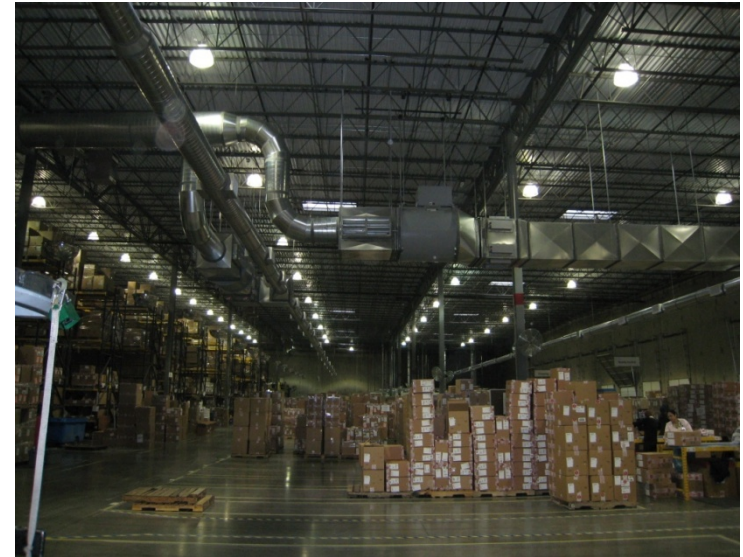

The effect and its outcome have featured in articles in many entertainment and listings magazines.

SPECIALLY DESIGNED SYSTEM FOR LARGE SPACES

Aircode's strength is its ability to adapt capacity and provide solutions for every customer using the simplest of means, even in enormous spaces.

Fagerdala World Foams, Marysville, MI, USA
Aircode was picked by DEQ as BACT

Crocs Distribution Center, Denver, CO, USA
Particle and gas elimination in 27,000 m²

CX INSTALLATIONS

ICA, City Gross, Axfood, COOP, housing associations, home owners, property managers and flower & fruit cultivators all verify Aircode performance.

ICA
The first of the 4 big Supermarket chains in Sweden to implement Aircode

Kabbarps Gardencenter
Reduced flower rejects to almost zero

WASTE HANDLING

Waste handling is one of Aircode's biggest customer segments. More and more communities and counties are turning to Aircode.

Wheelie-bin room in Helsingborg
15 minutes after the chiller was switched off the odour had vanished.

Danderyd municipality
Saved significant amounts when building Stocksundsgården, by utilizing Aircode technology.
